MOHAMED CHARA

SOFTWARE ENGINEER.

I'm a junior professional with strong work experience at just 23 years old. I've worked internationally, from Singapore to Luxembourg, as a data engineer and software engineer. My skills span various technologies, including ReactJS, Java Springboot, Flutter, and SwiftUI. Additionally, I'm certified in Google Cloud Platform tools. I'm dedicated to being a dependable partner for projects, committed to their success.

WORK EXPERIENCE

SOFTWARE ENGINEER
April **2023 - Present**

Banque de Luxembourg, Luxembourg

- Played a key role in the transition from Xamarin to Flutter, with a pivotal role in developing the new Document section app.
- Collaborated with a cross-functional team to architect and implement innovative solutions
- Used Java and Spring Boot to create robust API routes, facilitating seamless communication between front-end and back-end.

TECH LEAD & CO-FOUNDER
September **2020 -** January **2023**

Com'On, Worldwide

- Conceptualized and led the development of a robust API, enabling seamless interaction between Android and iOS clients and establishing connectivity with Firebase.
- Spearheaded the deployment of our services onto the web, extending the reach of our solution to a global audience.
- Seamlessly integrated a plethora of functionalities into the application through the API, enhancing the user experience and functionality.

BLOCKCHAIN DEVELOPER & CO-FOUNDER
2021 - June **2022**

Ponko NFT · Self-employed

- Smart Contract Development: I spearheaded the development of the smart contract, the core infrastructure that underpinned our entire NFT ecosystem. This contract enabled the creation, ownership, and trading of our unique pets on the Solana blockchain.
- Website and Blog Development: I took charge of creating our web presence, designing and developing our website to showcase our project to the world. Additionally, I established a blog to keep our community informed and engaged with our progress.
- Roadmap Creation: I meticulously crafted a roadmap that outlined our project's vision, goals, and milestones. This document served as a guiding light for both our team and our community.

- Decision making

Specialisation in Data Engineering, Big Data, and Machine Learning on GCP
ID B6L73MHUV2H4

SOFTWARE ENGINEER   April **2021 -** October **2021**

Decathlon Singapore, Singapore

- Developed a secure login system for the e-commerce site, enhancing user experience and data privacy.
- Played a role in expanding the Order Management System's capabilities by implementing new functionalities.
- Designed and developed a complete e-commerce website from scratch, encompassing user paths and tracking functionalities.

PROJECT MANAGER   September **2019 -** June **2020**

Junior Conseil Taker, France

- Formulated and executed a regional HR strategy, effectively harnessing the talents of our student members to deliver exceptional value to our clients.
- Assumed complete financial stewardship of our projects, ensuring the successful execution of assignments while adhering to budgetary constraints.
- Nurtured robust client relationships and managed all stakeholder interactions, upholding our commitment to excellence and client satisfaction.
- Orchestrated and facilitated management meetings, fostering an environment of collaboration and ideation to drive our organisation's growth.

DATA ENGINEER INTERN   July **2019 -** November **2019**

La Redoute, France

- Designing and Enhancing 'Big Data' Pipelines.
- Curating Complex Data Sets that align with both functional and non-functional business needs.
- Architecting seamless data flow by crafting foundational infrastructure for efficient data extraction, utilizing Cloud Function, SQL, and Google Cloud Platform technologies to optimize data flow from diverse sources.
